

# *TTS - Työtehoseura* *(Work Efficiency Institute)*

TTS is a research, development and training institute established in 1924.

TTS improves the competence, productivity and well-being of its customers.

[www.tts.fi](http://www.tts.fi)

**TTS carries out research, development and education operations in the following fields:**

- Vehicles and construction machines
- Natural resources and energy
- Logistics
- Services
- Construction
- Housing and the environment
- Productivity and well-being

**FOR COMPANIES AND ORGANISATIONS**

Companies and organisations may utilise the education, research and development services of TTS to develop their operations, staff and productivity.

**Examples of our education, research and development services:**

- Staff training
  - education leading to vocational qualifications and part qualifications, short-term education increasing professional skills, occupational card training, driver competence training, as well as simulator training
- Training for situations of change
  - recruitment, change and spot-on training
- Consulting, training and expert services
  - related to the development of business operations, working methods, technology, productivity, cost-efficiency, energy-efficiency, eco-efficiency and housing
- Research results
  - in the fields of natural resources and energy, housing and the environment, as well as productivity and well-being
- Machinery and equipment testing

TTS provides services for companies and organisations in all its operating sectors. Regardless of the sector, TTS provides all companies and organisations with consulting, training and expert services concerning productivity and well-being.

**FOR STUDENTS**

TTS annually helps over 8,000 people become even better professionals in different fields. Our range of training courses includes vocational qualifications, further qualifications and specialist vocational qualifications, as well as expanding competence through different short-term training modules.

**We offer education leading to vocational qualifications and short-term training modules in the following fields:**

- Technology and traffic
  - degrees in automotive sector, logistics, construction, the wood sector, upholstery, and interior decoration
- Natural resources and the environment
  - forest sector and gardening sector degrees
- In tourism, restaurant and consumer services
  - degrees in the tourism sector, restaurant sector and the domestic work service sector
- Society, business economy and administration
  - degrees related to management and entrepreneurship

Through the studies, you may maintain and further develop your professional competence while improving your opportunities to find success in the job market. Vocational studies and short-term training modules will also give you resources to develop your work and workplace.

We implement degree education leading to vocational qualification through self-study, education according to the labour policy, and apprenticeship education. TTS has its own apprenticeship office. Adult students may also directly complete vocational qualifications or part qualifications through a competence test if the student already has the required professional skills.

TTS publishes its research results in its bulletin and publication series, and the TEHO magazine, available for subscription through the online shop of TTS at [www.ttskauppa.fi](http://www.ttskauppa.fi).

For more information about all our products and services, as well as our education leading to vocational qualification and short-term training modules, please visit our website at [www.tts.fi](http://www.tts.fi).

## FOR EDUCATIONAL INSTITUTES AND DEVELOPMENT ORGANISATIONS

TTS is annually involved in over 100 national and international research, development and education projects as a coordinator, partner and an expert.

**We offer expert, training and lecture services, and material related to the following themes:**

- Work productivity
- Well-being at work
- Cost-efficiency
- Energy- and eco-efficiency
- Life-cycle housing
- Technology
  - e.g., simulators as a learning environment, automobile body competence
- Training material
  - practical research results, publications, reports, guides and software such as TTS-Kone and TTS-Manager.

TTS works actively in several national and international research, education and development networks. TTS carries out research, education and development cooperation with partners, aiming to improve the services offered to customers in different fields, as well as to further develop productivity and the operations.

## FOR HOUSEHOLDS

TTS studies and develops operating methods related to housing, home technology and energy efficiency, and provides research-based information about housing functionality, energy- and eco-efficiency, as well as kitchen and spatial planning. TTS is also involved in the development of domestic work and care services for households, and related entrepreneurship.

**We provide households with information and services on:**

- Energy-efficient and ecological housing
- Observing the special requirements of senior citizen housing
- Research results on domestic appliance selection and use
- Research-based, functional kitchen and spatial planning
- Quality information about domestic work services
- Short-term training related to construction, for example

The website of TTS at [www.tts.fi](http://www.tts.fi) has a lot of useful content for consumers. For example, [www.ekotoimivakoti.fi](http://www.ekotoimivakoti.fi) supplies information about eco-efficient and well-functioning housing solutions and the latest research results.

## FOR MEMBERS

TTS - Työtehoseura ry (Work Efficiency Institute) is an association for both private people and companies. Companies may join either as an actual member or a supporting member.

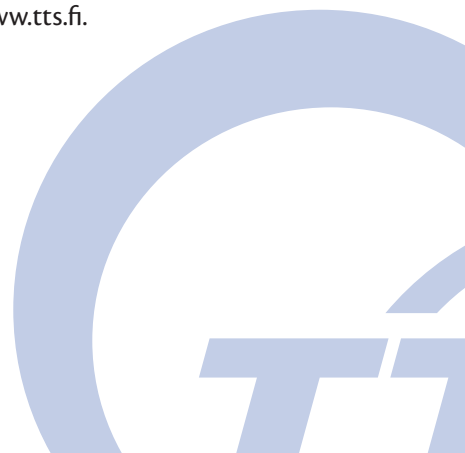

**Member benefits:**
