

## **Days at TTS : From workshop to campus Life**

*The four campuses of Työteho-seura (Nurmijärvi, Vantaa and Turku) allow the students to learn in an immersive environment during the training. Each campus is equipped with technological structures which provide fast and efficient work, to ensure qualitative and professional training.*

### Spaces in the campus

The campuses have several spaces dedicated to theory, but also to practice : all the machines have their simulators, which allows students to learn in all kinds of conditions, and to be best prepared for the exams.

Life in the campuses allows the students to feel accompanied during their learning: several living spaces have been arranged to allow students to relax during the moments of free time.

for one of the students who is taking painting classes, TTS is a place which is “Inspiring”, and where people work with "community spirit".

### Erasmus program and exchanges

TTS opens up to the world by offering students the opportunity to participate in exchange programs, such as Erasmus.

This program is an opportunity for the student to learn abroad and improve their skills. It's also an opportunity to “discover new people and new culture”, a student says.

*If you're interested in joining Työteho-seura, you can find more information on the website, or on our youtube channel “TTS Työteho-seura” and social media.*
